Telematics and data-driven insurance

Why is this relevant to the insurance industry?

Consumer behaviour
is changing

Increasing pressure
on profitability

The connected world: Insurers need to evolve to be 100% ready

Telematics can help as it provides benefits to both clients and insurers

PERSONAL

Changes insurers are required to make

1**Adapt culture****Focus on clients****2****Adapt business models****Take advantage of new technologies and big data****3****Invest in innovation****Find internal and/or external sources of innovation**

The **INSURANCE** industry is
on the brink of a **REVOLUTION.**
It's not a threat, is an **OPPORTUNITY!**
